Career Education/Employment Support

The development of the power of execution and employability to enable our students to play an active role in society is a significant focus of education at Ochanomizu University. Establishing a foundation for putting learned knowledge and skills into action in society and utilizing strengths to their fullest is also an important theme in the education we provide.

What is provided by the "Career Design Program" and other facets of the University's career/employment support is the ability required by a female leader to enable her to change society. This becomes the employability that will enable her to find a job that suits her, and the great power to face everything that life throws at her. We foster the ability to objectively examine oneself and create a vision for the future, the autonomy to take the initiative to engage in classwork, and the problem-solving skills needed by leaders, and develop a foundation for female leaders who will become a driving force in the society of the future.

Development of Competencies for Female Leaders

The group of Career Design Program courses consists of core courses and related courses. In addition to courses that are directly related to career design, core courses incorporate a large amount of project-based learning in which students address concrete problems raised in the real world, and serve as a "window" through which to view society. Related courses are courses selected from a variety of areas throughout the University, which have a deep connection to career development.

This program develops the three competencies (competency: the comprehensive ability to combine knowledge and skills to produce results) that are crucial for career design. A competency assessment system (My Portfolio) is used for periodic self-analysis, and to reflect on academic activities and encourage planning. The program develops the power of judgment that enables students to identify what types of ability they need, and facilitates motivated, systematic learning at the University.

- The 3 Competencies
- 1. Bilateral activities 2. Autonomous activities 3. Cooperative activities
- 1. Bilateral activities: Communication skills via language and ICT
- 2. Autonomous activities: The ability to set agendas and plan resolution measures for problems
- 3. Cooperative activities: Negotiation, coordination, and management skills

Course name	No. of	Competency area and purpose of the course	
	units		
Introductory Seminar: The History and Mission of Ochanomizu University	2	Give direction to the employability fostered by the program	
Education Program for Female Leaders (Basic Course)	2	Bilateral activities	Use language, symbols, and texts in an interactive manner
Theory of Intelligence Ambient	2	Bilateral activities	Use knowledge and information in an interactive manner

■ Career Design Program Core Courses

Information Communication Technology and Emergence	2		Use technology in an interactive manner	
Education Program for Female Leaders (Training Course)	2		Be active with a broad outlook	
Career Plan & Life Plan I	2	Autonomous	Design and execute life plans and individual projects	
Career Plan & Life Plan II	2	activities	Design and execute life plans and individual projects	
The Rights and Status of Working Women	2		Express one's own rights, interest, limits, and needs	
Working In a Cohesive Society	2		Create good relationships with others	
Group Work and Management	2	Cooperative	Work in a cooperative team	
Education Program for Female Leaders (Role-model Course)	2	activities	Process and resolve conflict	
Internship	1	Combine and imp	Combine and implement knowledge and skills appropriately	
Practice in Career Planning	1	Combine and imp	Combine and implement knowledge and skills appropriately	

■ Career Design Program Related Courses

Utilization of interactive tools	Autonomous activities	Collaboration in a social group
Programming Language	Research in Environmental Protection	NPO Internship
Colors and Sounds by Computers	Activities	Interdisciplinary Lectures: General
Business English I/II	Economics II	Theory of Business Concepts
English Presentation I/II	Information Processing	Approaches to Area Studies
Seminar 1: Geographical Information	Current English I/II	Information and Profession
System	Introduction to NPO	Practice in Somatometry
Introduction to the Japanese Language	Introduction to Political Science	Psychotherapy for Industrial Settings
I/II	Introduction to Political Science	Practice on Clinical Psychology
Chinese Communication Skills	Social Security and Social Welfare	Practice on Early Childhood Education
Chinese Composition 1	Geographical Fieldwork B	and Care
Chinese Composition 2	Chinese Area Studies	Special Practice on Developmental
Research Methods in Sociology	Advanced Lectures in Adult and	Clinical Psychology I/II
Globalization and Language Education I	Continuing Education	English Reading (Developmental and
Experimental Data Analysis	Money and Banking in Social Life	Clinical Psychology)
Introduction to Comparative Culture	Introduction to Economics	Seminar: Comparative Study of Culture
Theory	International Finance	
	Advanced Lectures in Adult and	
	Continuing Education II	

* See the "Web Syllabus" for details regarding course content. Some courses are not offered every year.

* This program has been designed in accordance with the key competencies framework proposed by the Organization for Economic Co-operation and Development (OECD).
