*1 The Color Code Benchmark (CCBM) system utilizes different simple and easy-to-understand colors to indicate the level of a course in light of its positioning and educational goals in the curriculum structure.

(1) Pink:

Courses in the curriculum structure that are best if taken first, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a relatively low level.

(2) Green:

Courses in the curriculum structure that are best if taken after courses indicated by the color code pink, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a slightly high level.

(3) Red:

Courses that are best if taken after courses indicated by the color code green, from the standpoint of the overall order of study. Or, courses that a student is authorized to take after achieving a certain grade point level in green courses. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a high level.

(4) Ivory:

Courses related to teacher, etc., qualifications.

(5) White:

Core courses (other than courses in information-related fields and foreign language courses) or certification courses through units that have already been earned or transfer of credits, etc.

*2 CCBM does not apply.

□ Course registrants include non-regular students (non-degree students, special auditing students, and Japanese Studies students). However, auditing students are excluded.

Human Life and Environmental Sciences special courses	Lecture	Comparative research of chldcare/education practicesIV	※2	8	6

*1 The Color Code Benchmark (CCBM) system utilizes different simple and easy-to-understand colors to indicate the level of a course in light of its positioning and educational goals in the curriculum structure.

- (1) Pink: Courses in the curriculum structure that are best if taken first, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a relatively low level.
- (2) Green: Courses in the curriculum structure that are best if taken after courses indicated by the color code pink, from the standpoint of the overall order of study. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a slightly high level.
- (3) Red: Courses that are best if taken after courses indicated by the color code green, from the standpoint of the overall order of study. Or, courses that a student is authorized to take after achieving a certain grade point level in green courses. Or, courses that do not fall into any specific order in relation to other offered courses, but for which the difficulty of the content or the targets of learning are set at a high level.
- (4) Ivory: Courses related to teacher, etc., qualifications.
- (5) White: Core courses (other than courses in information-related fields and foreign language courses) or certification courses through units that have already been earned or transfer of credits, etc.

*2 CCBM does not apply.

□ Course registrants include non-regular students (non-degree students, special auditing students, and Japanese Studies students). However, auditing students are excluded.
