

## **1-5 The purpose of the Faculty of Transdisciplinary Engineering**

The purpose of the Faculty of Transdisciplinary Engineering is to foster human resources capable of co-creating new human-centered technologies and cultures based on an understanding of the significance of collaboration between engineering, the humanities, and social sciences toward the realization of a society that is inclusive of diversity and has a sustainable and rich culture.

### **(1) Department of Human-Centered Engineering**

The Department of Human-Centered Engineering shall foster human resources who create and disseminate rich environments and technologies for people by collaborating knowledge from engineering, the humanities, and social sciences to solve social issues.

### **(2) Department of Humanities Data Engineering**

Department of Humanities Data Engineering trains personnel to collect and analyze materials related to human culture and society by applying digital technology and data science, and to contribute to the creation of culture and value using engineering thinking and technology, in order to realize a society with rich culture.
